Executive Summary

Senior Data Analyst with **4+ years supporting investment decision-making at Peak XV Partners**, building Power BI dashboards, AI-assisted data pipelines, and SQL-driven analysis that inform startup evaluation. Background in operations leadership (AVP-News Operations, Tracxn) brings scale and process-design experience to data work. Skilled in SQL, Power BI, DAX, Python, and BigQuery.

Technical Skills

BI & Visualization	Power BI, DAX, Power Query, Data Modeling, Row-Level Security (RLS), Tabular Editor
Programming & Automation	Python (Pandas), AI-Assisted Workflows (Claude, Claude Code), SQL (BigQuery, MySQL)
Web Scraping	Web Scraper, Instant Data Scraper, Octoparse, Open CLI
Tools	Jupyter Notebook, Advanced Excel, Power point, Google Sheets
Others	Investment/Startup Evaluation Analytics, Competitive Intelligence, Data Quality & Process Design, Statistical Analysis, Prompt Engineering

Work Experience

Peak XV Partners — *Sep 2022 – Present*

Senior Data Analyst

- Built **10+ Power BI dashboards** with data modeling, DAX, and RLS via Tabular Editor — iterated based on investment team feedback — benchmarking target companies against 4-5 competitors for investment decisions
- Queried BigQuery via SQL — joins and filtering across tables — to extract and prepare scraped competitive datasets for analysis
- Developed a custom AI-assisted web scraping tool (Claude Code), **cutting per-company research time by ~65%** (a day to 2-3 hours), extracting ~100 public discussions per company across 20+ target companies over 6 months, with manual sentiment analysis for competitive benchmarking
- Designed and iterated a classification methodology for a 900-record brand research pipeline through prompt engineering and AI-assisted execution, **cutting unusable outcomes by 60%+**
- Directed AI-assisted classification of large datasets (3,000+ menu items, 600+ retail locations), manually defining rules, auditing output precision (92% on sampled rows), and tracking methodology changes to catch errors and flag non-comparable results

Tracxn — *Jun 2017 – Sep 2022*

AVP, News Operations — *2021 – Sep 2022*

- Led a **20-member organization** (3 managers, 17 executives) across news operations — owning SOPs, employee training, and data-quality strategy
- Partnered with the automation team to improve extraction and processing workflows for **~7,000 news articles/day**, driving initiatives to increase throughput, improve data quality, and meet same-day closure deadlines
- Redesigned SOPs for manual research and keyword-identification processes, introducing new methodologies that **reduced task turnaround time by ~25%**

Manager, Information Executive Team — *Jun 2018 – 2021*

- Managed and reviewed output for a team of 6 Information Executives — handling quality review, error resolution, and team operations (leave management, performance)

Information Executive — Company Profiling & News — *Jun 2017 – Jun 2018*

- Conducted manual research to build structured company profiles and track news/product trends across multiple research teams

Relevant Projects

- **People Analytics** — Analyzed employee data to identify patterns in attrition and retention. Built interactive Power BI dashboards with Excel-based data cleaning and transformation.
- **Tactical Crime Analysis** (Power BI Challenge) — Built an interactive Power BI dashboard analyzing 2,500+ crime records for a dataset-based Power BI challenge — including resolved-rate tracking, monthly trend drill-downs, geographic distribution mapping, and offender/victim demographic analysis.

Education

C.V. Raman College of Engineering, Bhubaneswar
B.Tech — Electronics & Telecommunications

Other Relevant Information

Certifications	Google Data Analytics (Coursera), IBM Data Science (Coursera) | Ongoing: 100 Days of Python
Languages	English, Hindi, Odia, Japanese (Beginner)
